SANIL D TISON

IT SUPPORT & OPERATIONS LEADER

Desktop Support | End-User Computing | Service Delivery | Technical Operations

Jacksonville, FL

904-916-1460 | saniltison@gmail.com

Portfolio: it-management-leadership-portfolio.replit.app

PROFESSIONAL SUMMARY

Technology and operations leader with approximately 24 years across U.S. Navy service and civilian enterprise IT. Leadership spans maintenance supervision, communications watch operations, technician and engineer guidance, service restoration, and client delivery. Combines desktop and end-user support foundations with infrastructure, networking, security, and cloud experience to lead technical work and support operational continuity.

LEADERSHIP AND OPERATIONS

Technical team leadership | Work assignment and scheduling | Incident escalation and restoration | Maintenance planning | Mentoring and qualifications | Stakeholder communication

PROFESSIONAL EXPERIENCE

TAIG IT Solutions | Founder & Manager

2026 - Present

- Lead client discovery, service planning, technical delivery, provider coordination, and follow-through across IT consulting and AI-assisted initiatives.
- Translate business priorities into technical work, coordinate clients and specialists, and keep ownership, risks, dependencies, and next actions visible.

Amazon Web Services | Security Engineer

Jul 2023 - Oct 2024

- Supported cloud security and infrastructure operations through technical investigation, validation, remediation coordination, and documentation.

Brooks Rehabilitation | Senior Network Engineer

Apr 2023 - Jul 2023

- Served as technical lead for a three-engineer network team, helping schedule projects, providing technical direction, and supporting escalations while engineers managed their assigned queues.
- Led troubleshooting, restoration, and infrastructure improvements across enterprise healthcare network, wireless, segmentation, and security environments.

PAX Technology | Lead Network Engineer

Nov 2022 - Feb 2023

- Served as primary network engineer for modernization across three off-site locations and an onsite mid-sized data center.
- Led planning, implementation, troubleshooting, and restoration; helped align network design and operations with financial-industry security and compliance requirements.

SANIL D TISON

ADDITIONAL ENTERPRISE ENGINEERING EXPERIENCE

Kemper / BTG | Network / Infrastructure Engineer
2022 | Enterprise network support, implementation, and troubleshooting.

American Tower / Insight Global | Network Administrator / Engineer
Apr 2021 - Mar 2022 | Infrastructure across five data centers and 50+ offices; Cisco ACI and automation.

Jacksonville Aviation Authority / Robert Half | Network / Infrastructure Support
Aug 2020 - Jan 2021 | Airport and remote-site network support and restoration.

AUSGAR Technologies | Network Engineer IV
Oct 2018 - Mar 2020 | Navy R&D networking, security, Linux, automation, testing, and validation.

SAIC | Systems / Network Engineer
May 2017 - Sep 2018 | Network and systems support, VMware ESXi, and Windows Server.

CompQsoft / NMCI | Network Engineer
Feb 2017 - May 2017 | Navy enterprise networking, configuration, and troubleshooting.

U.S. NAVY LEADERSHIP EXPERIENCE

Technology & Operational Leadership | 2002 - 2016

- **USS Porter - Lead CANES Engineer:** Led approximately five technicians supporting shipboard IP and enterprise services for more than 300 sailors; guided troubleshooting, restoration, user support, and operational continuity.
- **NCTS Bahrain - ONE-Net Lead Military Engineer:** Led approximately four sailors maintaining enterprise network services supporting Middle East operations; coordinated technical work, escalation, restoration, and maintenance.
- **NCTS Sicily - Communications Watch Officer:** Served approximately three years coordinating communications readiness, outages, logs, technical response, and continuity between watch teams.
- **NCTS Sicily - N3 Leading Petty Officer:** Coordinated daily priorities, personnel assignments, training, qualifications, watch scheduling, and operational readiness.
- **USS Leyte Gulf - Workcenter Supervisor:** Supervised two workcenters and approximately seven sailors; assigned preventive and corrective work through the Navy Planned Maintenance System (3-M), supported qualifications, and tracked 13-Week Accountability.
- **Aviation Maintenance - Night Check Supervisor:** Directed assigned personnel, maintenance priorities, scheduled and unscheduled work, and shift turnover in coordination with Maintenance Control.

TECHNICAL SKILLS

Enterprise networking and infrastructure | Cisco ACI, routing and switching | Network security | AWS | Linux | Windows Server | VMware | Automation | Technical documentation

EDUCATION

California Institute of Arts & Technology
Computer Information Systems - Networking Concentration | Coursework; degree not completed

HISTORICAL CERTIFICATIONS

CCNA Security | CompTIA Security+ | CompTIA Network+ | CompTIA Server+
Historical credentials; not represented as current certifications.
